

## Biomedical Intervention Worksheet

Intervention	Dose	Date Started	Response (1...7)	Date Stopped	Response (1...7)	Restarted	Response (1...7)	Comments
Remove food additives	n/a							
Decrease sugars/artificial sweeteners	n/a							
increase fiber	n/a							
increase protein	n/a							
multivitamin--Super Nu Thera								
vitamin C								
vitamin E								
vitamin B6								
vitamin A								
vitamin B12								
Folic acid								
Zinc								
calcium								
magnesium								
allergenic foods	n/a							
Casein-free diet								
Gluten-free diet								
Saccharomyces boulardii								
nystatin								
systemic antifungals								
Flagyl								
Probiotics-lactobacillus, bifidobacter								
antiparasitics-Bactrim/Humatin								
yeast-free diet	n/a							
DMSA								
Lipoic acid								
melatonin								
taurine								
glutathione								
omega-3 fatty acids								
primrose oil								
secretin								
IVIg								
oral steroids								
colostrum								
transfer factor								
antivirals								
DMG								
Tryptophan								
Bethanacol								
Cod Liver Oil								

**KEY: Clinical Global Impression of Change:**  
**1 - Very much improved, 2 - Much Improved, 3 - Minimal Improvement, 4 - No Change, 5 - Minimal Worsening, 6 - Much Worse, 7 - Very Much Worse**
